Quality products from WITT

Benefits to you:

- 100 % quality inspection of all products leaving our factory
- Certificates: DIN EN ISO 9001, DIN EN ISO 22000 as well as PED 2014/68/EU, ATEX 2014/34/EU, Directive 93/42/EWG
- State-of-the-art technologies and elaborate quality assurance systems
- Easy, intuitive operation, ergonomics, integration capabilities and cost effectiveness
- Engineered products tailored exactly to your needs
- Individual solutions for your applications

Our product range

In this catalogue you will find our main models and series.
Furthermore we offer special custom-designed products, to your individual specifications.

“Engineering services included. Working closely with you.

Adopting our gas technology to the requirements of the customers is our daily business. Because gas applications are as different and varied as technical gases and gas mixtures.

Our decades of experience and extensive know-how will give you the safety you need: for your employees, your material and your processes.

Please talk to us about your requirements - we can help you for sure!

Any other questions?

We provide you with expert answers!

Our front desk will connect you directly to the person in charge.

Gas Control Equipment

1. Gas mixers for non-flammable gases	6
2. Gas flow control systems for non-flammable gases.....	12
3. Gas mixers for flammable gases	13
4. Gas mixers for medical applications	15
5. Mixed gas receivers	16
6. Gas analysers	18
7. Leak detection equipment.....	24
8. Data logger	26

Gas Safety Equipment

9. Flashback arrestors for pressure regulators, outlet points and pipelines	27
10. Flashback arrestors for torches	31
11. Flashback arrestors for cutting machines	34
12. Flashback arrestors for high flows	35
13. Flashback arrestors for central acetylene supply	37
14. Quick couplings	39
15. Non-return valves	42
16. Safety relief valves	47
17. Stainless steel devices	49
18. Pressure regulators	56
19. Mobile pressure regulating stations	63
20. Stationary pressure regulating stations	64
21. Outlet points	65
22. Test rigs	67
23. Equipment for oxygen lancing	68
24. Gas filters	70
25. Metering valves.....	71
26. Ball valves	72
27. Safety hose reels	74
28. Accessories	75

Miscellaneous

Explanations thread types	80
Training , Certification, documentation and instruction manuals	81
Conversion of units of measurements	81
WITT support material - overview	82

1. GAS MIXERS for non-flammable gases

KM20 ECO		2 gases small flows
	Small Gas mixer especially for dispensing equipment • variable mixture output • pre-set gas blends • various flow capacities	KM20 ECO KM 20-1 ECO with one outlet KM 20-2 ECO with two outlets
KM20 ECO		

M M		2 gases small to medium flows
	Compact Gas mixer for different applications • adjustable mixing valve • mixed gas flow dependent on inlet pressures • various flow capacities	MM-2 MM-2K MM-2G
MM-2		

M M - Flex		2 gases small to medium flows
	Ultra compact gas mixer for different applications, e.g. welding • adjustable mixing valve • adjustable metering valve • adjustable pressure	MM-Flex MM-Flex
MM-Flex		

B M		2 gases small flows
	Gas mixer for direct cylinder connection (high pressure) • constant output • infinitely variable gas blending • infinitely variable metering • no additional pressure regulator required • various flow capacities	BM-2 BM-2M (200 bar) BM-2M (300 bar)
BM-2M		

1. GAS MIXERS for non-flammable gases

KM10-2 Flex		2 gases small flows
 KM10-2 Flex	Small gas mixer especially for low gas consumption, e.g. in laboratory applications • variable mixture output • variable gas blending • various flow capacities • new mixing technology, mixed gas receiver is not required	KM10-2 Flex KM10-2 Flex

MG Fix		2 or 3 gases medium to high flows
 MG Fix	Pre-set 2 or 3 components gas mixers • variable mixture output • mixing range dependent on type of gas • new mixing technology, mixed gas receiver is not required	MG-2 Fix for 2 gases MG 25-2 capacity range up to approx. 22 Nm³/h MG 45-2 capacity range up to approx. 46 Nm³/h MG 75-2 capacity range up to approx. 68 Nm³/h MG 95-2 capacity range up to approx. 90 Nm³/h MG 125-2 capacity range up to approx. 135 Nm³/h MG-3 Fix for 3 gases MG 45-3 capacity range up to approx. 46 Nm³/h MG 95-3 capacity range up to approx. 90 Nm³/h MG 125-3 capacity range up to approx. 135 Nm³/h options: inlet pressure monitoring with alarm module AM3

MG Flex		2 gases medium to high flows
 MG Flex	Adjustable 2 components gas mixers for welding applications • variable mixture output • mixing range dependent on type of gas • new mixing technology, mixed gas receiver is not required	MG-2 Flex MG 25-2 capacity range up to approx. 22 Nm³/h MG 45-2 capacity range up to approx. 46 Nm³/h MG 75-2 capacity range up to approx. 68 Nm³/h MG 95-2 capacity range up to approx. 90 Nm³/h MG 125-2 capacity range up to approx. 135 Nm³/h options: inlet pressure monitoring with alarm module AM3

KM		2 or 3 gases small to medium flows
 KM20-2	Mixing system for different technical applications • constant output • infinitely variable gas blending • infinitely variable metering • various flow capacities	KM-2 for 2 gases KM 20-2 KM 30-2 KM 60-2 KM 100-2 KM-3 for 3 gases KM 20-3 KM 30-3 KM 60-3 KM 100-3

1. GAS MIXERS for non-flammable gases

KM - M		2 or 3 gases medium to high flows
 KM100-2M KM100/200-M KM300/600-M	Gas mixer especially for MAP-packaging and flow-pack machines Features - see model KM (above) plus: - regulation of outlet pressure - monitoring of gas supply - integrated inlet pressure monitoring (alarm module AM3)	KM-2M for 2 gases KM 100-2M KM 200-2M KM 300-2M KM 600-2M KM-3M for 3 gases KM 100-3M KM 200-3M KM 300-3M KM 600-3M optional: automatic shut-off of O₂ when going below the limit
	 for food-grade gases, conforms to 1935/2004	

KM - ME		2 or 3 gases low to very high flows
 KM100-2ME on steel receiver Picture shows optional equipment Powerful gas mixer especially for highly fluctuating mixing gas output quantities - adjustable mixing valve - with receiver pressure management for use with mixed gas receiver - also for central gas supply installations - various flow capacities - alarm module AM3 (optional): integrated inlet pressure monitoring with digital display for pressure (with analogue pressure transmitters) plus optical alarm, adjustable alarm limits, alarm acknowledgement required, protection of alarms, interfaces for controlling external alarms etc.		KM-2ME for 2 gases KM100-2ME KM100-2ME mounted on 20 l / 10 bar steel receiver KM100-2ME mounted on 20 l / 10 bar stainless steel receiver KM100-2ME mounted on 100 l / 10 bar steel receiver KM100-2ME mounted on 100 l / 10 bar stainless steel receiver KM-3ME for 3 gases KM100-3ME KM100-3ME mounted on 20 l / 10 bar steel receiver KM100-3ME mounted on 20 l / 10 bar stainless steel receiver KM100-3ME mounted on 100 l / 10 bar steel receiver KM100-3ME mounted on 100 l / 10 bar stainless steel receiver options: inlet pressure monitoring with alarm module AM3 surcharge for analogue pressure transmitter for 2 inlet gases surcharge for analogue pressure transmitter for 3 inlet gases

KM - M +		2 or 3 gases medium to high flows
 KM100-2M+	Gas mixer especially for MAP-packaging and flow-pack machine Features - see model KM-M (above) plus: - communication by serial Interface (e.g. PLC, PC or 4-20mA/0-10V) - incl. communication software via PC	KM-2M+ for 2 gases KM 100-2M+ KM 200-2M+ KM-3M+ for 3 gases KM 100-3M+ KM 200-3M+ option: operation via touch-screen display coupling socket set
	 for food-grade gases, conforms to 1935/2004	

1. GAS MIXERS for non-flammable gases

KM-Flow		2 or 3 gases medium to high flows
 KM-Flow with analyser	Gas mixer especially for MAP-packaging and flow-pack machines • electronic Mass Flow Controller (MFC) • touchscreen • measured data storage • may be combined with analysis MAPY LE • for up to 1000/1500 l/min	KM1000-2 Flow for 2 gases KM1000-2 Flow for flow-pack machines KM1000-2 Flow for vacuum machines
		KM1500-3 Flow for 3 gases KM1500-3 Flow for flow-pack machines KM1500-3 Flow for vacuum machines

MG-2ME		2 gases low to very high flows
 MG50-2ME on steel receiver MG50/100-ME MG200-ME Picture shows optional equipment	MG-2ME MG50-2ME MG50-2ME mounted on 100 l / 10 bar steel receiver MG50-2ME mounted on 100 l / 10 bar stainless steel receiver MG100-2ME MG100-2ME mounted on 250 l / 11 bar steel receiver MG100-2ME mounted on 250 l / 11 bar stainless steel receiver MG200-2ME (see option "external filter") options: inlet pressure monitoring with alarm module AM3 external filter as additional protection for each gas inlet recommended for MG 50 and MG 100; mandatory for MG 200 surcharge for analogue pressure transmitter for 2 inlet gases	

Powerful gas mixer especially for high flows and highly fluctuating mixing gas output quantities

- adjustable mixing valve
- various flow capacities
- with receiver pressure management for use with mixed gas receiver
- also for central gas supply installations
- alarm module AM3 (optional): integrated inlet pressure monitoring with digital display for pressure (with analogue pressure transmitters) plus optical alarm, adjustable alarm limits, alarm acknowledgement required, protection of alarms, interfaces for controlling external alarms etc.

1. GAS MIXERS for non-flammable gases

MG-3ME

3 gases | low to very high flows

MG50-3ME

alarm module AM3

MG-3ME

MG50-3ME

MG50-3ME mounted on 100 l / 10 bar steel receiver

MG50-3ME mounted on 100 l / 10 bar stainless steel receiver

MG100-3ME

MG100-3ME mounted on 250 l / 11 bar steel receiver

MG100-3ME mounted on 250 l / 11 bar stainless steel receiver

MG200-3ME (see option „external filter“)

options:

inlet pressure monitoring with alarm module AM3

external filter as additional protection for each gas inlet recommended

for MG 50 and MG 100; mandatory for MG 200

surcharge for analogue pressure transmitter for 3 inlet gases

Powerful gas mixer especially for high flows and highly fluctuating mixing gas output quantities

- adjustable mixing valve
- various flow capacities
- with receiver pressure management for use with mixed gas receiver
- also for central gas supply installations
- alarm module AM3 (optional): integrated inlet pressure monitoring with digital display for pressure (with analogue pressure transmitters) plus optical alarm, adjustable alarm limits, alarm acknowledgement required, protection of alarms, interfaces for controlling external alarms etc.

KM-MEM

2 or 3 gases | low to high flows

KM100-2MEM

KM100-3MEM

KM-2MEM for 2 gases

KM100-2MEM

KM100-2MEM mounted on 20 l / 10 bar steel receiver

KM100-2MEM mounted on 20 l / 10 bar stainless steel receiver

KM200-2MEM

KM200-2MEM mounted on 20 l / 10 bar steel receiver

KM200-2MEM mounted on 20 l / 10 bar stainless steel receiver

KM-3MEM for 3 gases

KM100-3MEM

KM100-3MEM mounted on 20 l / 10 bar steel receiver

KM100-3MEM mounted on 20 l / 10 bar stainless steel receiver

KM200-3MEM

KM200-3MEM mounted on 20 l / 10 bar steel receiver

KM200-3MEM mounted on 20 l / 10 bar stainless steel receiver

option:

automatic shut-off e.g. of O₂ when going below the limit

Powerful gas mixer especially for MAP- and vacuum-packaging machines and highly fluctuating mixing gas output quantities

Features - see model ME (above) plus:

- integrated inlet pressure monitoring (alarm module AM3)
- monitoring of gas supply
- to be used with mixed gas receiver, incl. inlet pressure monitoring

1. GAS MIXERS for non-flammable gases

KM - MEM +

2 or 3 gases | low to high flows

KM100-2MEM+

Electronic gas mixing system with motor-driven mixing valve especially for MAP- and vacuum packaging machines

Features - see model KM-MEM (above) plus:

- communication by serial Interface (e.g. PLC, PC or 4-20mA/0-10V)
- to be used with mixed gas receiver, incl. inlet pressure monitoring

for food-grade
gases, conforms to
1935/2004

KM-2MEM+ for 2 gases

- KM100-2MEM+
- KM100-2MEM+ mounted on 20 l / 10 bar steel receiver
- KM100-2MEM+ mounted on 20 l / 10 bar stainless steel receiver
- KM200-2MEM+
- KM200-2MEM+ mounted on 20 l / 10 bar steel receiver
- KM200-2MEM+ mounted on 20 l / 10 bar stainless steel receiver

option:

- operation via touch-screen display
- coupling socket set

KM-3MEM+ for 3 gases

- KM100-3MEM+
- KM100-3MEM+ mounted on 20 l / 10 bar steel receiver
- KM100-3MEM+ mounted on 20 l / 10 bar stainless steel receiver
- KM200-3MEM+
- KM200-3MEM+ mounted on 20 l / 10 bar steel receiver
- KM200-3MEM+ mounted on 20 l / 10 bar stainless steel receiver

option:

- operation via touch-screen display
- coupling socket set

product video: this is how our
electronic gas mixer works

MG - MEM +

2 or 3 gases | higher flows

MG50-2MEM+

Electronic gas mixing system with motor-driven mixing valve especially for MAP- and vacuum packaging machines with higher flows

Features - see model KM-MEM+ (above)

for food-grade
gases, conforms to
1935/2004

MG-2MEM+ for 2 gases

- MG50-2MEM+
- MG50-2MEM+ mounted on 100 l / 10 bar steel receiver
- MG50-2MEM+ mounted on 100 l / 10 bar stainless steel receiver
- MG50-2MEM+ mounted on 250 l / 11 bar steel receiver
- MG50-2MEM+ mounted on 250 l / 11 bar stainless steel receiver

option:

- operation via touch-screen display
- coupling socket set

MG-3MEM+ for 3 gases

- MG50-3MEM+
- MG50-3MEM+ mounted on 100 l / 10 bar steel receiver
- MG50-3MEM+ mounted on 100 l / 10 bar stainless steel receiver
- MG50-3MEM+ mounted on 250 l / 11 bar steel receiver
- MG50-3MEM+ mounted on 250 l / 11 bar stainless steel receiver

option:

- operation via touch-screen display
- coupling socket set

2. GASFLOW CONTROL SYSTEMS for non-flammable gases

KD		gas flow controller with O ₂ -analysis	
 KD500-1A MAPY ZRL	Electronical flow control systems for modified atmospheres in the food industry • with integrated zirconia cell for O₂-measurement • integrated PID control loop for automatic gas flow control • potential free contacts for min./ max. alarms	KD KD500-1A MAPY ZRL	
		options: sample testing via needle additional electrochemical sensor for sample testing heater and thermostat, only electro-chemical sensors	
 for food-grade gases, conforms to 1935/2004			

KM-MAPY ZRL		gas mixer and meterer
 KM100-2M MAPY ZRL	2-components gas mixers with integrated O₂ analysis	KM-2M MAPY ZRL
	Features - see model KD plus:	KM100-2M MAPY ZRL
	• MAPY-analysis (see p. 20) • potential free contacts	KM200-2M MAPY ZRL
		KM300-2M MAPY ZRL
		KM600-2M MAPY ZRL
	options:	
		gas mixer with M+ (remote control)

“In our brochure you can read everything you always wanted to know about WITT Gas Mixers.

Gas mixers offer maximum mixing quality, flexibility and economy. But which model is the best for your specific application?

Looking for the right mixer, a lot of questions come up, e.g.

- Which advantages offer the different mixing technologies and mixing valves, such as mechanical, pneumatical or electrical?
- Which design fits best in my installation: compact, mobile or stationary?
- What kind of components are available: pressure monitoring, inline gas analysis, tanks, explosion protection?

Find answers, discover technologies and have a look at our models overview in the new WITT gas mixers brochure.

Download at ► www.wittgas.com

3. GAS MIXERS for flammable gases

KM10-2 Flex		2 gases small flows
 KM10-2 Flex	Small gas mixer especially for little gas consumption, e.g. in laboratory applications • variable mixture output • variable gas blending • various flow capacities • new mixing technology, mixed gas receiver is not required	KM10-2 Flex
		KM10-2 Flex

KM		2 or 3 gases small to medium flows
 KM100-3	Gas mixing systems for different applications, e.g. for welding applications • infinitely variable gas blending • variable mixture output • various flow capacities • certified in accordance to ATEX	KM-2 for 2 gases (1 gas flammable)
		KM 20-2
		KM 30-2
		KM 60-2
		KM 100-2
		KM-3 for 3 gases (max. 2 flammable gases)
		KM 20-3
		KM 30-3
		KM 60-3
		KM 100-3

KM-ME Ex		2 or 3 gases low to very high flows
 KM100-3ME Ex	Powerful gas mixers especially for highly fluctuating mixing gas output quantities For features - see KM (above) plus: • separate electrical control panel • 5 m cable between control unit and mixing device • certified in accordance to ATEX • model A with integrated analysis, LC-display, 4-20 mA signal and min./max. alarms (further information in section 6 „Gas analysers“) • alarm module AM3 (optional): integrated inlet pressure monitoring with digital display for pressure (with analogue pressure transmitters) plus optical alarm, adjustable alarm limits, alarm acknowledgement required, protection of alarms, interfaces for controlling external alarms etc.	KM-2ME Ex for 2 gases
		KM100-2ME Ex
		KM100-2ME Ex A, with integrated analysis (see section „Gas analysers“)
		KM100-2ME Ex mounted on 20 l / 10 bar steel receiver
		KM100-2ME Ex mounted on 20 l / 10 bar stainless steel receiver
		KM100-2ME Ex mounted on 100 l / 10 bar steel receiver
		KM100-2ME Ex mounted on 100 l / 10 bar stainless steel receiver
		KM-3ME Ex for 3 gases
		KM100-3ME Ex
		KM100-3ME Ex mounted on 20 l / 10 bar steel receiver
		KM100-3ME Ex mounted on 20 l / 10 bar stainless steel receiver
		KM100-3ME Ex mounted on 100 l / 10 bar steel receiver
		KM100-3ME Ex mounted on 100 l / 10 bar stainless steel receiver
		options:
		inlet pressure monitoring with alarm module AM3 (for Ex)
		surcharge for analogue pressure transmitters Ex, 2 inlet gases
		surcharge for analogue pressure transmitters Ex, 3 inlet gases

3. GAS MIXERS for flammable gases

MG-ME Ex

MG100-ME Ex
MG200-ME Ex

Powerful gas mixers especially for highly fluctuating mixing gas output quantities

Features - see KM (above) plus:

- separate electrical control panel
- 5 m cable between control unit and mixing device
- certified in accordance to ATEX
- model A with integrated analysis, LC-display, 4-20 mA signal and min./max. alarms (further information see section 6 „Gas analysers“)
- alarm module AM3 (optional): integrated inlet pressure monitoring with digital display for pressure (with analogue pressure transmitters) plus optical alarm, adjustable alarm limits, alarm acknowledgement required, protection of alarms, interfaces for controlling external alarms etc.

2 or 3 gases | low to very high flows

MG-2ME Ex for 2 gases

MG50-2ME Ex
MG50-2ME Ex A, with integrated analysis (see section „Gas analysers“)
MG50-2ME Ex mounted on 100 l / 10 bar steel receiver
MG50-2ME Ex A, with integr. analysis, mounted on 100 l/10 bar steel receiver
MG50-2ME Ex mounted on 100 l / 10 bar stainless steel receiver
MG50-2ME Ex A, with integr. analysis, mounted on 100 l/10 bar stainl. steel rec.
MG100-2ME Ex
MG100-2ME Ex A, with integrated analysis
MG100-2ME Ex mounted on 250 l / 11 bar steel receiver
MG100-2ME Ex mounted on 250 l / 11 bar stainless steel receiver
MG200-2ME Ex (see option „external filter“)
MG200-2ME Ex A, with integrated analysis (see option „external filter“)

MG-3ME Ex for 3 gases

MG50-3ME Ex
MG50-3ME Ex mounted on 100 l / 10 bar steel receiver
MG50-3ME Ex mounted on 100 l / 10 bar stainless steel receiver
MG100-3ME Ex
MG100-3ME Ex mounted on 250 l / 11 bar steel receiver
MG100-3ME Ex mounted on 250 l / 11 bar stainless steel receiver
MG200-3ME Ex (see option „external filter“)

options:

inlet pressure monitoring with alarm module AM3 (for Ex)
external filter as additional protection for each gas inlet recommended for MG 50 and MG 100; mandatory for MG 200
surcharge for analogue pressure transmitters Ex, 2 inlet gases
surcharge for analogue pressure transmitters Ex, 3 inlet gases

04/01/2022

“We can do big, too.

Adopting our gas technical solutions to meet the needs of customers is our daily business. Hence we offer a wide range of special mixers, e.g.

- with flows up to 2000 Nm³/h
- from very small mixing ranges (0-5%) up to very big ones (0-100%)
- with integrated gas analysis
- with numerous safety features such as monitoring of inlet pressures and temperatures, alarm function with automatic switch or cut off, heating for mixer and control unit, filter in the gas inlet, lockable doors, etc.

Please contact us. Together we will identify a WITT solution specific to your requirements.

For an overview of our support material see p. 82-83

4. GAS MIXERS for medical applications

MED-MG

for synthetic air

MG50-2ME GB A

Worldwide and long-term proven gas mixing system for the production of synthetic air for medical applications

- in accordance with DIN EN ISO 7396-1 section 3.27
- medical product class IIb, CE identification marking according to EG 93/42/EWG
- various flow capacities
- to be used with mixed gas receiver, incl. inlet pressure monitoring
- also for central gas supply installations
- integrated oxygen analyser, redundant design
- various system surveillances
- housing IP55

MED-MG

MED-MG 50-2ME GB A
MED-MG 100-2ME GB A
MED-MG 200-2ME GB A
MED-MG 500-2ME GB A
each with 2 gas filters 077 and printed operation manual

options:

automatic calibration
heating (for low ambient temperatures)

MED-stainless steel gas receiver (coated) incl. safety devices and connections:

volume	pressure	design	blow-off output SV*
100 litres	10 bar	vertical	382 Nm ³ /h
250 litres	11 bar	vertical	417 Nm ³ /h
500 litres	11 bar	vertical	795 Nm ³ /h
1,000 litres	11 bar	vertical	795 Nm ³ /h
2,000 litres	11 bar	vertical	2,234 Nm ³ /h
4,000 litres	11 bar	vertical	2,234 Nm ³ /h

* blow-off output of the safety relief valve, different rates on demand (surcharge)

“Further evolution:

From alarm module to compact all-rounder

The new AM3 processes signals in the 4-20 mA range and can manage up to 8 alarms. Current values are displayed on the TFT display and important events are saved by the integrated data logger. In addition to its alarm function, the AM3 can also monitor external control systems.

And since we have not changed the installation dimensions, the AM3 can easily be retrofitted onto any WITT gas mixer with alarm module.

More information at ► www.wittgas.com

For an overview of our support material see p. 82-83

5. MIXED GAS RECEIVERS

Steel receivers

steel receiver, vertical,
without safety devices and connections

Receivers 20 - 250 l: ground coated and pickled
Receivers 500 - 2,000 l: powder coated

- internally degreased and oil-free
- use of humid gases or oxygen may cause corrosion
- certificate of CE-conformity conforms to PED for receivers
- operation temperatures -15°C up to +100°C

without safety devices and connections

volume	pressure	design
20 litres	10 bar	horizontal
20 litres	16 bar	horizontal
100 litres	10 bar	horizontal
100 litres	21 bar	horizontal
250 litres	11 bar	horizontal
500 litres	11 bar	vertical
1,000 litres	11 bar	vertical
1,000 litres	16 bar	vertical
2,000 litres	11 bar	vertical
2,000 litres	16 bar	vertical

Stainless steel receivers

stainless steel receiver, horizontal,
without safety devices and connections

Stainless steel, not coated

- internally degreased and oil-free
- recommended especially for high oxygen concentrations (>21%)
- certificate of CE-conformity conforms to PED for receivers
- operation temperatures -196°C up to +50°C

without safety devices and connections

volume	pressure	design
20 litres	10 bar	horizontal
20 litres	16 bar	horizontal
100 litres	10 bar	horizontal
100 litres	16 bar	horizontal
100 litres	21 bar	horizontal
250 litres	11 bar	horizontal
250 litres	16 bar	horizontal
250 litres	21 bar	horizontal
500 litres	11 bar	vertical
500 litres	16 bar	vertical
1,000 litres	11 bar	vertical
1,000 litres	16 bar	vertical
2,000 litres	11 bar	vertical
2,000 litres	16 bar	vertical

5. MIXED GAS RECEIVERS

Steel receivers

steel receiver, vertical,
incl. safety devices and connections

With ground coat, pickled, passivated

- internally degreased and oil-free
- use of humid gases or oxygen may cause corrosion
- incl. safety relief valve
- up to 250l available as a unit with gas mixer
- certificate of CE-conformity conforms to PED for receivers
- operation temperatures -15°C up to +100°C
- operation temperatures of safety relief valve -10°C up to +50°C

incl. safety devices and connections

volume	pressure	design	blow-off output SV*
20 litres	10 bar	horizontal	117 Nm ³ /h
20 litres	16 bar	horizontal	181 Nm ³ /h
100 litres	10 bar	horizontal	117 Nm ³ /h
100 litres	21 bar	horizontal	181 Nm ³ /h
250 litres	11 bar	horizontal	523 Nm ³ /h
500 litres	11 bar	vertical	523 Nm ³ /h
1,000 litres	11 bar	vertical	1,880 Nm ³ /h
1,000 litres	16 bar	vertical	1,750 Nm ³ /h
2,000 litres	11 bar	vertical	2,490 Nm ³ /h
2,000 litres	16 bar	vertical	3,265 Nm ³ /h

* blow-off output of the safety relief valve, different rates on demand (surcharge)

surcharge for gas mixer mounted on receiver (up to max. 250 litres)

option for receiver-gas mixer-units:
TÜV approval conforms to PED 2014/68/EU, module G

Stainless steel receivers

Stainless steel receiver, horizontal
incl. safety devices and connections

Stainless steel, not coated

- internally degreased and oil-free
- recommended for high oxygen concentrations (>21%)
- incl. safety relief valve
- up to 250l available as a unit with gas mixer
- certificate of CE-conformity conforms to PED for receivers
- operation temperatures -196°C up to +50°C
- operation temperatures of safety relief valve depend on model

incl. safety devices and connections

volume	pressure	design	blow-off output SV*
20 litres	10 bar	horizontal	117 Nm ³ /h
20 litres	16 bar	horizontal	181 Nm ³ /h
100 litres	10 bar	horizontal	117 Nm ³ /h
100 litres	16 bar	horizontal	181 Nm ³ /h
100 litres	21 bar	horizontal	276 Nm ³ /h
250 litres	11 bar	horizontal	523 Nm ³ /h
250 litres	16 bar	horizontal	741 Nm ³ /h
250 litres	21 bar	horizontal	276 Nm ³ /h
500 litres	11 bar	vertical	523 Nm ³ /h
500 litres	16 bar	vertical	741 Nm ³ /h
1,000 litres	11 bar	vertical	1,880 Nm ³ /h
1,000 litres	16 bar	vertical	1,750 Nm ³ /h
2,000 litres	11 bar	vertical	2,490 Nm ³ /h
2,000 litres	16 bar	vertical	3,265 Nm ³ /h

* blow-off output of the safety relief valve
Different blow-off rates and safety relief valves for specific temperatures
(-196° up to +50°C)

Surcharge for gas mixer mounted on receiver (up to max. 250 litres)

option for receiver-gas mixer-units:
TÜV approval conforms to PED 2014/68/EU, module G

6. GAS ANALYSERS

OXYBABY® M+

portable O₂ / CO₂ gas analyser - basic model

Compact handheld O₂ / CO₂ analyser e.g. for sample testing of MAP-packages (basic model)

- quick and precise
- data log of 100 results (measurement, date, time, product/line no.)
- administration of product data and product names
- incl. carrying case, spare needles and filters

OXYBABY® M+

OXYBABY® M+	for O ₂
OXYBABY® M+	for O ₂ / CO ₂

options:

connector tube with Luer-Lok-connection

OXYBABY® 6.0

portable O₂ / CO₂ gas analyser - premium model

Compact handheld O₂ / CO₂ analyser e.g. for sample testing of MAP-packages (premium model)

features see above, plus:

- minimum sample gas requirement (approx. 2ml)
- minimised response time
- measurement of pressure
- USB-interface
- data-log of 500 results
- comfort operation
- integrated needle and filter checks

OXYBABY® 6.0

OXYBABY® 6.0	for O ₂
OXYBABY® 6.0	for O ₂ / CO ₂

options:

connector tube with Luer-Lok-connection
integrated barcode reader
bluetooth (e.g. for separate tabletop printer)
further accessories: see p. 19 and 21

product video and further information see
▶ www.oxybaby.com

OXYBABY® M+P

basic gas analyser for pressurised pipelines

Mobile O₂ / CO₂ sample analysis in pressurised pipelines, mainly in welding technology (basic model)

- fast and precise
- battery operation
- integrated memory for the last measurements
- including carrying case and G 1/4 AG connection

OXYBABY® M+ P

OXYBABY® M+ P	for O ₂
OXYBABY® M+ P	for CO ₂
OXYBABY® M+ P	for O ₂ / CO ₂

OXYBABY® 6.0 P

premium gas analyser for pressurised pipelines

Mobile O₂ / CO₂ sample analysis in pressurised pipelines, mainly in welding technology (premium model)

features see above, plus:

- data-log of 500 results (analysis values, date, time of measurement)
- administration of up to 25 users
- comfort operation
- simplified menu navigation etc.

OXYBABY® 6.0 P

OXYBABY® 6.0 P	for O ₂
OXYBABY® 6.0 P	for CO ₂
OXYBABY® 6.0 P	for O ₂ / CO ₂

6. GAS ANALYSERS

OXYBABY® MED

Compact handheld O₂/CO₂ analyser for checking medical gases

- quick and precise
- data log of last 500 measurements
- administration of users applications and allocations
- hygienic and low maintenance

portable O₂/CO₂ gas analyser for medical applications

OXYBABY® MED

OXYBABY® MED	for O ₂
OXYBABY® MED	for O ₂ /CO ₂

options:

- data cable
- set of adapter for various connections
- bluetooth (e.g. for separate printer)

OXYBABY®-Accessories

e.g. for the use of the OXYBABY® as a tabletop unit

Accessory for all OXYBABY® models:

- table rack

Accessories for the OXYBABY® 6.0 premium models:

- documentation software OBCC
- integrated barcode reader
- bluetooth printer

OXYBABY®-Accessories

- Table rack for OXYBABY®
- connector tube with Luer-Lok-connection
- integrated barcode reader
- tabletop bluetooth printer

OBCC software for the documentation of analysis results: see page 21

OXYBABY®-Accessories

Canpiercer

Aquacheck

Image exemplary
Oxybaby® and bottle not included

Special packages are hardly controllable by standard analysis devices. Therefore WITT offers a special construction which is suitable for all OXYBABY® models

- for head space analysis of cans and bottles, with or without overpressure/gas
- for O₂ and CO₂ analysis of mini packages, e.g. capsules

for cans, bottles and mini packages

OXYBABY®-Accessories

order no.

Canpiercer for cans and bottles (with set for head space analysis)

for cans without overpressure/gas (e.g. juice)*

for max. piercing height of 270 mm, needle length 5,5 mm 590000156

for cans and bottles with overpressure/gas, incl. bottle adapter*

for max. piercing height of 270 mm, needle length 8,5 mm 590000165

for max. piercing height of 390 mm, needle length 8,5 mm 590000166

for max. piercing height of 390 mm, needle length 18,5 mm 590000325

for cans with high overpressure/gas (strongly sparkling drinks)

incl. calibration module and flow control*

for max. piercing height of 270 mm, needle length 5,5 mm 590000239

for cans and bottles, pressure measurement only, incl. bottle adapter*

for max. piercing height of 390 mm, needle length 5,5 mm 590000341

*other versions on request

Canpiercer-module (for refitting):
bottle adapter

Aquacheck

equipment for the gas analysis of mini packages

Aquacheck Plus

Aquacheck incl. water container

6. GAS ANALYSERS

OXYBEAM

Laser gas analyser for non-destructive sample testing of packages

- state-of-the-art laser technology for determining O₂ or CO₂ content
- avoids waste costs
- for packaging with transparent film area (min. height 5 mm)

non-destructive sample gas analyser

OXYBEAM

OXYBEAM	for O ₂
OXYBEAM	for CO ₂

option:

plate with magnetic fixing for packages from 5 mm height

PA 7.0

Compact tabletop analyser for sample- and continuous testing of food packages (MAP) and for welding applications

- different designs: P (pressure), L (lance) and S (sample)
- connector set (output and alarm signals)
- with zirconia measuring cell for O₂ for quicker measurements

tabletop O₂ / CO₂ gas analyser

PA 7.0

PA 7.0 for O ₂	version P or L
PA 7.0 for CO ₂	version P or L
PA 7.0 for O ₂ /CO ₂	version P or L
PA 7.0 for O ₂	version S
PA 7.0 for O ₂	version S and L
PA 7.0 for O ₂ /CO ₂	version S
PA 7.0 for O ₂ /CO ₂	version S and L

options:

handle
coupling socket set (output signals; alarm contacts)
integration of the analysing system in the mixer housing
zirconia measuring cell for O₂
O₂ measurement in ppm-range (surcharge calibration)
heating and thermostat, only electro-chemical sensors
paramagnetic sensor
OBCC software for the documentation of analysis results: see page 21

MAPY 4.0 / MAPY LE

MAPY 4.0 - inclined display
for use in laboratory

MAPY LE - vertical display
for use as inline analyser

Premium gas analyser for sample- and continuous testing of food packages (MAP)

- for use in laboratory (housing with inclined display) and in production line (housing with vertical display)
- different designs: P (pressure), L (lance) and S (sample)
- connector set (output and alarm signals)
- optional: zirconia measuring cell for O₂ for quicker measurements
- MAPY LE: ideal also for inline analysis of flow packaging machines; minimisation of gas consumption by combination with the gas mixer KM-FLOW

O₂ / CO₂ gas analyser, sample + inline

MAPY

MAPY 4.0 / MAPY LE	O ₂	version P or L
MAPY 4.0 / MAPY LE	CO ₂	version P or L
MAPY 4.0 / MAPY LE	O ₂ /CO ₂	version P or L
MAPY 4.0 / MAPY LE	O ₂	version S
MAPY 4.0 / MAPY LE	O ₂	version S and L
MAPY 4.0 / MAPY LE	O ₂ /CO ₂	version S
MAPY 4.0 / MAPY LE	O ₂ /CO ₂	version S and L

options:

zirconia measuring cell
paramagnetic measuring cell (incl. larger housing)
external barcode reader
coupling socket set
analysis software GASCONTROL CENTER
fully automatic calibration 1 channel
fully automatic calibration 2 channels
O₂ measurement in ppm-range (surcharge calibration)
heating and thermostat, only electro-chemical sensors
different Ethernet cables (only for MAPY in vertical housing)

6. GAS ANALYSERS

MAPY VAC

Inline gas analyser for continuous control of modified atmospheres in traysealers and thermoformers

- measures the O₂ or O₂/CO₂ concentration before sealing the package
- with touchscreen or as black box version (BB)
- option: analysis of buffer tank
- ideal in combination with a WITT gas mixer

O₂ / CO₂ gas analyser, for traysealers and thermoformers

MAPY VAC

MAPY VAC O₂ Zr
MAPY VAC O₂ Zr BB
MAPY VAC O₂/CO₂ Zr
MAPY VAC O₂/CO₂ Zr BB
MAPY VAC O₂ Zr, incl. buffer analysis
MAPY VAC O₂ Zr BB, incl. buffer analysis
MAPY VAC O₂/CO₂ Zr, incl. buffer analysis
MAPY VAC O₂/CO₂ Zr BB, incl. buffer analysis

Options:

cover IP45

Inline gas analysis

GC 50

Gas Analysers for H₂, He, etc. to be combined with WITT gas mixers

- gas mixer and analyser as a compact unit
- integrated analysis with LCD display touchscreen
- min./max. alarms
- for flammable gases certified to ATEX

integrated with gas mixer

gas analysis for gas mixers

analyser system H₂ (Ex, Thermal Conductivity Sensors)
analyser system H₂ (Ex, Thermal Conductivity Sensors) with additional cut-off valve for flammable gases
analyser system He (Thermal Conductivity Sensors)
analyser system O₂ (chemical)
zirconia measuring cell for analyser system O₂ (chemical)
analyser system O₂ (paramagnetic)
analyser system CO₂ (infrared)
analyser system O₂ / CO₂ (chemical/infrared)
analyser system O₂ / CO₂ (paramagnetic/infrared)
integration of the analysing system in the mixer housing (MG 200 without surcharge)

Options

Back-purging device for inline gas analysers against blocked filters on gas inlets

Additional functions for optimising the process

- data export and analysis
- automatic calibration
- alarm function
- error advice
- back-purging device against blocked filters

for WITT gas analysers

options for WITT gas analysers (except MAPY and MFA)

digital paperless chart recorder, 3 channels
integration chart recorder in mixer
LED-warning light with horn
digital chart-recorder (only GC 50)
data logger (only GC 50)
implementation of USB interface on the back or the front of the housing
analysis of the flow measurement (4-20mA), without flow-sensor
automatic calibration (not for PA), 1 channel
automatic calibration (not for PA), 2 channels
automatic calibration in Ex-version (not for PA), 1 channel
automatic calibration in Ex-version (not for PA), 2 channels
error advice via e-mail (only in combination with data logger (GC50))

back-purging device for inline gas analysers

OBCC

Windows software for the documentation of analysis measuring results. For OXYBABY® 6.0, P 6.0, Med and PA 7.0

- modern, intuitive interface
- graphic representation of the measured data, verifiable PDF reports
- comfortable data management with import and export function

documentation software for OXYBABY® 6.0 and PA

Software

free 30-day trial version

OBCC full version incl. updates
Licence for 1 year
Licence for 2 years

Free download OBCC trial version

Download the 30-day trial version of OBCC (for Windows) now without obligation and free of charge. Just fill out the form. You will immediately receive a confirmation e-mail with the download link.

6. GAS ANALYSERS

MFA 9000

multigas-analyser

MFA 9000

Portable multigas-analyser especially for maintenance and service

- for analysis of up to 14 different combinations of gases
- continuous analysis
- 4-20 mA output signal
- digital display

MFA 9000

MFA 9000

HYDROBABY

mobile moisture measurement

HYDROBABY

Mobile device for analysing moisture in gases

- short response times
- dewpoint from -110° up to 20°C
- latest sensor technology
- easy navigation
- large display
- USB interface for data export

HYDROBABY

HYDROBABY

options:

pressure compensation
4-20 mA outlet

MFA H₂O

stationary moisture measurement

MFA H₂O

Table-top device for analysing moisture in gases

Features - see HYDROBABY plus:

- overpressure design with metering valve and flow meter
- USB interface for data export

MFA H₂O

MFA H₂O

options:

pressure compensation
4-20 mA outlet
integrated vacuum pump with battery and external charger

RLA100

ambient air monitoring

RLA100

Compact ambient air monitor for the detection of CO₂

- 2 alarm limits
- 4-digit display and 4 LEDs for visual control of gas concentration
- gas measuring computer with integrated alarm device (light and horn)
- easy wall-mounting

RLA100

RLA100

6. GAS ANALYSERS

RLA compact

Compact ambient air monitoring system for the detection of O₂, CO₂, H₂ etc, incl. gas monitor, transmitter and transmitter cable

- simultaneous monitoring of up to four gas inlets
- freely adjustable limits per software
- data logger
- exceeding the limits generates alarm and triggers a potential free contact

ambient air monitor

RLA compact

- gas monitor 1-channel
- every additional transmitter channel (max. 4)
- transmitter for O₂
- transmitter for CO₂ - not Ex
- transmitter for O₂ Zircor - not Ex
- transmitter for combustible gases H₂, methane, ethylene, propane (under explosion limit -0.50/100% UEG) - Atex: Zone 2, Cat. 3G
- transmitter for CO
- flow adapter (recommended for calibration)
- transmitter cable per meter and transmitter

RLA multichannel

Compact ambient air monitoring system for the detection of O₂, CO₂, H₂ etc, incl. gas monitor, transmitter and transmitter cable

- simultaneous monitoring of different gas inlets
- freely adjustable limits
- intuitive menu design
- exceeding the limits generates alarm and triggers a potential free contact

ambient air monitor

RLA multichannel

- 4-channel gas monitor with alarm
- additional channel (up to 16 channels possible)
- transmitter for O₂
- transmitter for CO₂ - not Ex
- transmitter for O₂ Zircor - not Ex
- transmitter for combustible gases H₂, methane, ethylene, propane (under explosion limit -0.50/100% UEG) - Atex: Zone 2, Cat. 3G
- transmitter for CO
- flow adapter (recommended for calibration)
- transmitter cable per meter and transmitter

Inlet pressure monitoring

separate inlet pressure monitoring

For continuous inlet pressure monitoring for maximum process safety

- simultaneous monitoring of up to 3 gas inlets
- freely adjustable limits
- intuitive menu design
- exceeding the limits generates alarm and triggers a potential free contact

with alarm module AM3

Inlet pressure monitoring

- separate
- for flammable gases as Ex-version with separate control housing
- options:
- data cable
- ALARM CONTROL software
- surcharge for analogue pressure transmitters, 2 inlet gases
- surcharge for analogue pressure transmitters, 3 inlet gases
- surcharge for analogue pressure transmitters Ex, 2 inlet gases
- surcharge for analogue pressure transmitters Ex, 3 inlet gases
- LED warning light with signal-horn

04/01/2022

“WITT gas analysers for MAP applications: Technique, performance, practice.

From the handy Oxybaby® via the compact PA up to the award-winning MAPY: In our special brochure you will find detailed information about our O₂/ CO₂ gas analysers.

Download at ► www.wittgas.com

7. LEAK DETECTION EQUIPMENT

LEAK-MASTER® EASY

For the detection of even the smallest leaks, without operating with trace gas

- for all flexible and stable types of packages, also without modified atmosphere
- easy, intuitive handling
- visual principle of measurement, reveals the position of the leak
- administration and documentation of user and product data (only with control unit PLUS)

bubble-test

LEAK-MASTER® EASY chamber size in approx. mm (HxWxD)

EASY 0.5	115 x 305 x 195
EASY 1	165 x 305 x 195
EASY 1.5	145 x 505 x 310
EASY 2	205 x 505 x 310
EASY 3	275 x 525 x 360
EASY 4	320 x 625 x 500
EASY 5	340 x 760 x 500

options:	order no.
vacuum-set	956.992700
electrical vacuum pump	
vacuum holding valve	800961000
calibrated manometer	800942100
ASTM F2096 testing set	966129800

control unit PLUS	5901LME-Z-001
options for control unit:	
barcode reader IP 65	957099400

product video and further information see
► www.leak-master.net

LEAK-MASTER® PRO 2

Fast, non-destructive detection of even the smallest leaks in MAP-packages, CO₂-based

- non-destructive sample leak testing at a strong price-performance ratio
- without using expensive helium or hydrogen
- detects even the smallest of leaks from 10 µm (depending on the product and the test conditions) with highly sensitive and ultra-fast CO₂ sensor
- housing made of acrylic glass
- visual indication of test results (LED lighting)
- 3 chamber sizes for single packages or small boxes
- measuring range 0 ppm - 5.000 ppm
- user and product administration and documentation
- data transfer via ethernet

CO₂-based

LEAK-MASTER® PRO chamber size in approx. mm (HxWxD)

LM 2.1	42 x 310 x 200
LM 2.2	174 x 310 x 200
LM 2.3	100 x 460 x 305

options:	order no.
barcode reader IP 65	957099400
electrical vacuum pump	
analysis software GASCONTROL CENTER	

product video and further information see
► www.leak-master.net

7. LEAK DETECTION EQUIPMENT

LEAK-MASTER® PRO

LEAK-MASTER® PRO

Fast, non-destructive detection of even the smallest leaks in MAP-packages, CO₂-based

- for large packages and E2-boxes
- detects even the smallest leaks
- measuring range 0 ppm - 5.000 ppm
- user and product administration and documentation
- data transfer via ethernet

CO₂-based, for large packages

LEAK-MASTER® PRO

LM 12.2
LM 12.1

chambre size in approx. mm (WxDxH)

140 x 680 x 500
230 x 680 x 500

options:

WLAN (WIFI)
barcode reader IP 65
analysis software GASCONTROL CENTER
connection for rinsing air

order no.

966042600
957099400
966042500

LEAK-MASTER® MAPMAX

MAPMAX

MAPMAX compact

Uniquely quick and precise inline-leak detection of packages containing CO₂ directly from the packaging machine for trays/thermoform packaging or secondary packages respectively boxes (vacuum layout optionally)

features see LEAK-MASTER® PRO, plus:

- integration in the packaging process
- automatic product positioning
- automatic product transport to the following process
- up to 15 cycles per minute

All sizes imply: W x D x H (the width „W“ refers to the moving direction of the conveyor-belt). The height includes the alarm lamp.

inline

LEAK-MASTER® MAPMAX

size in approx. mm (WxDxH)

MAPMAX Type 400 compact
max. product dimensions 600 x 400 x 380 mm
up to 14 cycles per minute

1167 x 1408 x 2200

MAPMAX Type 400
max. product dimensions 600 x 400 x 380 mm
up to 15 cycles per minute

1840 x 1130 x 2200

MAPMAX Type 700 compact
max. product dimensions 600 x 680 x 220 mm
up to 14 cycles per minute

1167 x 1408 x 2200

MAPMAX Type 700
max. product dimensions 600 x 680 x 220 mm
up to 15 cycles per minute

1840 x 1130 x 2200

options:

WIFI
barcode reader IP 65
analysis software GASCONTROL CENTER

MINK vacuum pump
central vacuum layout (control valve central vacuum)
surface pressurisation (incl. motorisation)
e.g. to speed up and improve the measurements for packages with a low gas volume

product video and further information see
► www.leak-master.net

Accessories

barcode reader

GASCONTROL CENTER

For process optimisation with models EASY PLUS, PRO and MAPMAX

- quick registration of user-, product- and process data
- digital documentation
- comfortable data transfer

for WITT leak detectors

WIFI (not for Control Unit PLUS)
barcode reader IP 65
analysis software GASCONTROL CENTER
Test-Leak (60µ) for the inspection of measuring and testing equipment (only for LEAK-MASTER® MAPMAX, PRO 2 and PRO)

8. DATA LOGGER

PATBOX		data logger
	Compact logger for pressure and temperature • highly mobile and accurate • extremely small size • high process reliability • simple transmission of data via NFC • operation via Android App	PATBOX

04/01/2022

PATBOX Control App

“PATBOX - what is it actually?”

With the PATBOX, for example, machines working with a vacuum can be adjusted or the pressure inside modified atmosphere packaging can be controlled.

Your advantages:

- highly mobile and precise measurement
- extremely small size
- increased process reliability
- latest sensor technology
- comfortable configuration and software update via Android App
- simple data transmission via NFC
- large pressure range from 1 to 2,000 mbar
- wide temperature range from -20 to 60 °C
- brilliant OLED graphic display
- charging cradle for wireless charging of the battery

Do you need more information? Then talk to our experts.

9. FLASHBACK ARRESTORS for pressure regulators, outlet points and pipelines

RF53N

Acetylene max. 13 m³/h
Fuel gases max. 68 m³/h
Oxygen max. 187 m³/h

DIN EN ISO 5175-1

[FA] [NV] [TV]

also available in stainless steel, see p. 49

connection	inlet → outlet	order no.
for fuel gases:		
G 1/4 LH	MG → AGS	145-009
G 3/8 LH	MG → AGS	145-012
G 1/2 LH	MG → AGS	145-016
9/16" LH	MG → AGS	145-017
for oxygen:		
G 1/4 RH	MG → AGS	145-021
G 3/8 RH	MG → AGS	145-022
G 1/2 RH	MG → AGS	145-023
9/16" RH	MG → AGS	145-025
for fuel gases or oxygen:		
1/4" NPT	IG → IG	145-197
3/8" NPT	IG → IG	145-205
G 1/4 RH	IG → IG	145-125

RF53DN

Acetylene max. 11,5 m³/h
Fuel gases max. 105 m³/h
Oxygen max. 56 m³/h

DIN EN ISO 5175-1

with pressure relief valve

[FA] [NV] [TV]

connection	inlet → outlet	order no.
for fuel gases:		
G 3/8 LH	MG → AGS	145-041
G 1/2 LH	MG → AGS	145-043
9/16" LH	MG → AGS	145-044
for oxygen:		
G 1/4 RH	MG → AGS	145-048

G 1/2 RH	MG → AGS	145-050
9/16" RH	MG → AGS	145-051

RF53NSK

Acetylene max. 13 m³/h
Fuel gases max. 68 m³/h
Oxygen max. 187 m³/h

DIN EN ISO 5175-1

with integrated coupling
body according EN 561

[FA] [NV] [TV]

suitable probes see p. 39f

connection	inlet → outlet	order no.
for fuel gases:		
G 3/8 LH	MG → coupling body	145SK-002
9/16" LH	MG → coupling body	145SK-004
for oxygen:		
G 1/4 RH	MG → coupling body	145SK-008
G 3/8 RH	MG → coupling body	145SK-001
9/16" RH	MG → coupling body	145SK-003

9. FLASHBACK ARRESTORS for pressure regulators, outlet points and pipelines

85-10

Acetylene max. 22 m³/h
Fuel gases max. 235 m³/h
Oxygen max. 310 m³/h

DIN EN ISO 5175-1

FA NV TV

also available in stainless steel, see p. 49

connection	inlet → outlet	order no.
for fuel gases:		
G 3/8 LH	MG → AGS	143-002
G 1/2 LH	MG → AGS	143-008
9/16" LH	MG → AGS	143-009
for oxygen:		
G 1/4 RH	MG → AGS	143-013
G 3/8 RH	MG → AGS	143-016
G 1/2 RH	MG → AGS	143-019
9/16" RH	MG → AGS	143-022
for fuel gases or oxygen:		
1/4" NPT	IG → IG	143-323
3/8" NPT	IG → IG	143-105
G 3/8 RH	IG → IG	143-227

85-20

Acetylene max. 45 m³/h
Fuel gases max. 324 m³/h
Oxygen max. 333 m³/h

DIN EN ISO 5175-1

FA NV TV

also available in stainless steel, see p. 49

connection	inlet → outlet	order no.
for fuel gases:		
G 3/4 LH	MG → AGS	149-001
for oxygen:		
G 3/4 RH	MG → AGS	149-014
for fuel gases or oxygen:		
G 1/2 RH	IG → IG	149-002
1/2" NPT	IG → IG	149-003
G 3/4 RH	IG → IG	149-005
3/4" NPT	IG → IG	149-006
G 1 RH	IG → IG	149-004
1 NPT	IG → IG	149-017

85-30

Acetylene max. 70 m³/h
Fuel gases max. 675 m³/h
Oxygen max. 860 m³/h

DIN EN ISO 5175-1

FA NV TV

also available in stainless steel, see p. 50

connection	inlet → outlet	order no.
for fuel gases (except acetylene):		
G 3/4 LH	MG → AGS	147-001
G 1 LH	MG → AGS	147-003
for oxygen:		
G 3/4 RH	MG → AGS	147-065
G 1 RH	MG → AGS	147-068
for fuel gases (except acetylene) or oxygen:		
3/4" NPT	IG → IG	147-081
G 1 1/2 RH	IG → IG	147-069
1" NPT	IG → IG	147-072

“For specific needs: gas safety devices in stainless steel.

Anyone working with hydrogen, corrosive gases or pure gas requires a material that is especially designed for these conditions: stainless steel. Therefore WITT offers a wide range of stainless steel safety devices.

The latest production technologies, high-quality stainless steel (e.g. 1.4305/AISI 303, 1.4404/AISI 316L, 1.4541/AISI 321) and elastomers as well as a sophisticated quality management system guarantee highest quality. As a matter of course, WITT products fulfill all relevant international standards and norms. For your safety.

You can find our stainless steel products starting on page 49.
Further information on www.wittgas.com and in our "Stainless steel" brochure.

13. FLASHBACK ARRESTORS for central acetylene supply

FN12 / FN40

decomposition arrestor

Stops dangerous decomposition of acetylene in low pressure pipelines

“Every flashback arrestor 100% tested.

WITT stands for the highest quality, made in Germany. In addition to setting engineering standards, we use the best materials, excellent workmanship and a seamless quality assurance system. We developed our own testing equipment and procedures for testing every single flashback arrestor before delivery. Safe as it gets.

The WITT Company is certified for quality management system DIN EN ISO 9001:2008. Information on our product certifications and testing can be found on the data sheet. You can also find a list of all WITT certifications at:

► www.wittgas.com/company/quality-made-in-germany.html

For an overview of our support material see p. 82-83

☐ FA = flame arrestor ☐ NV = non-return valve ☐ TV = temperature controlled cut-off valve ☐ PV = pressure controlled cut-off valve

Please specify gas, pressures, temperatures, flows and connections at time of enquiry and order. For some gases, special seals may be required. Special designs, higher flow capacities or different pressures on demand. Explanations of thread types, conversion of units of measurement see p. 81.

for outlet points

Coupling bodies with automatic gas cut-off valve

EN 561 / ISO 7289

connection	inlet ⇌ outlet	order no.
• probes see SK100-2		
• coupling bodies		
for fuel gases:		
G 3/8 LH	MG ⇌ coupling body	150-015
for oxygen:		
G 1/4 RH	MG ⇌ coupling body	150-017
G 3/8 RH	MG ⇌ coupling body	150-018
for other gases:		
G 1/4 RH	MG ⇌ coupling body	150-019
G 3/8 RH	MG ⇌ coupling body	150-028

“Which coupling at which point? An overview.

Use our practical overview of the WITT coupling system SK100. Here you find:

- every module, from the gas outlet point to the torch
- all connections at a glance
- for fuel gases and oxygen
- on demand: editable pdf, to fill in your own order numbers

Download at: ► www.wittgas.com

For an overview of our support material see p. 82-83

14. QUICK COUPLINGS

Keymark coupling

Keymark couplings protect outlet points from unauthorised access: only the owner of the keymark is able to take gas from the outlet point

EN 561 / ISO 7289

for outlet points

connection	inlet ⇌ outlet	order no.
• coupling bodies		
for fuel gases:		
G 3/8 LH	MG ⇌ coupling body	150-029
for other gases:		
G 1/4 RH	MG ⇌ coupling body	150-033
• keymark		801836700
• coupling probes		
for fuel gases:		
4.0 mm	probe ⇌ nozzle	151-007
6.3 mm	probe ⇌ nozzle	151-009
8.0 mm	probe ⇌ nozzle	151-010
9.0 mm	probe ⇌ nozzle	151-011
G 3/8 LH	probe ⇌ AGS	151-048
for other gases:		
6.3 mm	probe ⇌ nozzle	151-021
G 1/4 RH	probe ⇌ AGS	151-047
G 3/8 RH	probe ⇌ AGS	151-046

15. NON-RETURN VALVES ULTRA

Ultra 10

Ultra Performance protection against gas return: compact, quiet, ideal for low pressure applications. Opening pressure approx. 4 mbar

Up to 16 bar / G 1/2"

[NV]

DIN EN ISO 5175-2

also available in stainless steel, see p. 51

connection	inlet → outlet	order no.
G 1/2 RH	IG → IG	034-003
1/2" NPT	IG → IG	034-007

design (standard):

filter: yes **seal O-ring:** NBR **seal valve:** CR **housing:** Brass

Ultra 12

Based on ULTRA 10 - your customised model: various combinations of housing and sealing materials, with or without filter

Up to 16 bar / G 1/2"

[NV]

DIN EN ISO 5175-2

also available in stainless steel, see p. 51

connection	inlet → outlet	order no.
G 1/2 RH	IG → IG	034-003

design (modular system):

filter	seal O-ring	seal valve	housing	
no	NBR	CR	Brass	034-001
yes	NBR	CR	Aluminum	034-005
yes	FPM	FKM	Brass	034-006

Other models and connection types on request

Ultra 20

Ultra Performance protection against gas return: compact, quiet, ideal for low pressure applications. Opening pressure approx. 4 mbar

Up to 16 bar / G 1", 1/2", 3/4"

[NV]

DIN EN ISO 5175-2

also available in stainless steel, see p. 51

connection	inlet → outlet	order no.
G 1/2 RH	IG → IG	036-022
G 3/4 RH	IG → IG	036-014
G 1 RH	IG → IG	036-015
1/2" NPT	IG → IG	036-024
3/4" NPT	IG → IG	036-020
1" NPT	IG → IG	036-021

design (standard):

filter: yes **seal O-ring:** NBR **seal valve:** CR **housing:** Brass

Ultra 22

Based on ULTRA 20 - your customised model: various combinations of housing and sealing materials, with or without filter

Up to 16 bar / G 1", 1/2"

[NV]

DIN EN ISO 5175-2

also available in stainless steel, see p. 51

connection	inlet → outlet	order no.
G 1 RH	IG → IG	

design (modular system):

filter	seal O-ring	seal valve	housing	
no	EPDM	EPDM	Brass	036-001
no	NBR	CR	Brass	036-003
yes	NBR	CR	Aluminum	036-008
yes	ISOLAST	ISOLAST	Aluminum	036-009

connection	inlet → outlet
G 1/2 RH	IG → IG

filter	seal O-ring	seal valve	housing	
yes	FPM	FPM	Brass	036-013

Other models and connection types on request

[FA] = flame arrestor **[NV]** = non-return valve **[TV]** = temperature controlled cut-off valve **[PV]** = pressure controlled cut-off valve

Please specify gas, pressures, temperatures, flows and connections at time of enquiry and order. For some gases, special seals may be required. Special designs, higher flow capacities or different pressures on demand. Explanations of thread types, conversion of units of measurement see p. 81.

15. NON-RETURN VALVES ULTRA

Ultra 30

Ultra Performance protection against gas return: compact, quiet, ideal for low pressure applications. Opening pressure approx. 5 mbar

Up to 16 bar / G 1.1/2"

NV

DIN EN ISO 5175-2

also available in stainless steel, see p. 52

connection	inlet → outlet	order no.
G 1.1/2 RH	IG → IG	033-001
1.1/2" NPT	IG → IG	033-007

design (standard):

filter: yes **seal O-ring:** NBR **seal valve:** CR **housing:** Brass

Ultra 40

Ultra Performance protection against gas return: compact, quiet, ideal for low pressure applications. Opening pressure approx. 5 mbar

Up to 16 bar / G 2.1/2"

NV

DIN EN ISO 5175-2

also available in stainless steel, see p. 52

connection	inlet → outlet	order no.
G 2.1/2 RH	IG → IG	035-004
2.1/2" NPT	IG → IG	035-005

design (standard):

filter: yes **seal O-ring:** NBR **seal valve:** CR **housing:** Brass

“ULTRA: Ultra-high performance comes as standard

ULTRA performance

New valve design - flow optimised
Maximum flow, minimal nominal size

ULTRA low opening pressure

From 4 mbar - ideal for low pressure applications
When every mbar counts

ULTRA compact

Small and lightweight
Perfect for compact plant designs

ULTRA silent

No fluttering - lowest noise emission
Less wear - longer service life

ULTRA flexible

Free combination of materials on customer request
Exactly suitable for your requirements

ULTRA safe

Reliably stops gas backflow and flashback

Typical applications

Low pressure pipelines

Thermal processing plants

Hydrogen applications

Biogas plants

15. NON-RETURN VALVES Standard

NV 654

Up to 60 bar
(O₂ up to 30 bar)

Air max. 130 m³/h

NV

DIN EN ISO 5175-2

also available in stainless steel, see p. 52

connection	inlet → outlet	order no.
G 1/8 RH	IG → AG	120003037

NV 100

Up to 25 bar

Air max. 130 m³/h

NV

DIN EN ISO 5175-2

also available in stainless steel, see p. 52

connection	inlet → outlet	order no.

pressure settings 5 - 500 mbar individual TÜV approval for the set opening pressure connections: G2 RH IG NPT 2" IG	order no. 400-__ __ (in accordance with pressure-setting)

“The most effective protection against overpressure from 5 mbar to 45 bar

For operators of pressurised systems and components they are the last line of defense before excess pressure becomes a disaster: Safety relief valves.

Safety relief valves from WITT provide effective protection against overpressure by blowing off vapours and gases from pipes, pressure vessels and system components.

Pressure regulators for medium flows, with maximum pressure stability. Complete solution for installation in pipelines, universal model and high pressure model

- pilot pressure regulator, inlet and outlet pressure gauges and connections included
- different mounting parts available (maintenance kit see p. 62)
- easy to install and to be integrated into the process
- 1: 1 interchangeable with the previous version (please specify if desired)

*depending on type of gas

“Maximum precision and unparalleled consistency: see how WITT Dome-loaded Pressure Regulators work

Whenever the highest pressure stability is required, even with fluctuating inlet pressures and flowrates, WITT dome pressure regulators are the best choice.

Watch our new video and learn why they show such a unique performance. Find out about highly diverse application and customization possibilities.

Dome Pressure Regulators

747 LE/S Smart

757 LE/S Smart

767 LE/S Smart

High performance dome-loaded pressure regulator set for inline installation, combined with high-tech sensor technology and electronic components.

- Signaling of inlet, outlet and pilot pressure
- Signaling of inlet and outlet temperature
- indication of the instantaneous gas flow rate
- digital display (optional)
- ideal for connected manufacturing

SMART models

All brass models of the dome pressure regulators 747LE/S, 757LE/S and 767LE/S are available as Smart models.

Smart model variations

„Standard“

Display, indication of inlet pressure and temperature as well as outlet pressure and temperature

„Standard + P3“

„Standard“ features, plus indication of pilot pressure

„Standard + Flow“

„Standard“ features, plus indication of flow rate

„Standard + P3 + Flow“

Dome Pressure Regulators

parallel construction with 757LE/S

757LE/S with flange filter

engineering - planning and installation

Individual parallel construction

Example I:

4 ball valves stainless steel DN50/PN40

2 dome pressure regulators 757LE/S

manifold DN50, counter-flange, TÜV-testing, CE labeling

installation on welded mounting frame

Example II:

dome pressure regulator 757LE/S

with flange filter 50 µm filter fineness, for oxygen up to 30 bar

with dirt catcher

delivery completely assembled and tested

More customisations possible, for example central filter, safety valve, other connection sizes, etc.
Suitable for oxygen, tested and ready for use, short delivery time

19. MOBILE PRESSURE REGULATING STATIONS

642

Mobile pressure regulating station, completely mounted and tested, ready-to-use

- for bundles
- with pressure regulator and safety devices

pressure regulating station

order no.

oxygen (300 bar/ 0-20 bar)

190211111

acetylene (25 bar/ 0-1.5 bar)

183112120

643

Mobile pressure regulating station, completely mounted and tested, ready-to-use

- for bundles with 4-6 integrated outlet points
- including flashback arrestors 85-10
- for oxygen with pressure regulator
- customisations available

pressure regulating station

order no.

4-outlets oxygen (300 bar/ 0-10 bar)

6-outlets oxygen (300 bar/ 0-10 bar)

183000049

4-outlets acetylene (25 bar/ 0-1.5 bar)

183000045

6-outlets acetylene (25 bar/ 0-1.5 bar)

183000050

Universal 704

704 - special edition

Mobile pressure regulating station, completely mounted and tested, ready-to-use

- for pipelines or connected to model 642
- including flashback arrestors 85-10
- for oxygen with pressure regulator
- customisations available

distribution station

order no.

4-outlets oxygen (40 bar/ 0-10 bar)
and acetylene (1.5 bar)

183000030

6-outlets oxygen (40 bar/ 0-10 bar)
and acetylene (1.5 bar)

183000031

Universal V6

Mobile pressure regulating station, completely mounted and tested, ready-to-use

- for pipelines or connected to model 642
- including flashback arrestors 85-10
- for oxygen with pressure regulator
- customisations available

distribution station

order no.

6-outlets oxygen (40 bar/ 0-10 bar)

183000153

6-outlets acetylene (1.5 bar)

183000154

20. STATIONARY PRESSURE REGULATING STATIONS

Pressure regulation station

acetylene (25 bar)

For ensuring continuous acetylene supply into a ring pipeline

DIN EN ISO 14114, acetylene regulation (TRAC)
Pressure regulators in accordance with ISO 7291

- completely mounted and tested, easy wall-mounting
- option: automatic switch-over (WITT-SWITCH)

model	connection	flow	order no.

Further accessories for higher pressures upstream, e.g.
hoses for bundle- and bottle-connections etc. on demand.

When ordering, please advise which gas.

21. OUTLET POINTS

Series 610

610 - example

Outlet point for the supply of technical gases from a ring pipeline, to be mounted at the wall

- maximum 3 gases
- to be combined individually
- completely with welding and soldering nipples for pipe
- nickel-plated tube with nickel-plated wall screens

order no.

mounting plate (completely mounted and tested)

610-1 one gas	290-__
610-2 two gases	290-__
610-3 three gases	290-__

ball valves

	male thread	
fuel gases max. 40 bar	G 3/8 RH - G 3/8 LH	198107082
acetylene max. 1.5 bar	G 3/8 RH - G 3/8 LH	198107082
oxygen max. 30 bar	G 3/8 RH	198207072
shielding gas max. 40 bar	G 3/8 RH	198307078

outlet point pressure regulators

acetylene max. 1.5 bar	044112900
oxygen max. 10 bar	044226300
shielding gas with manometer (0-30 l/min)	044524100
shielding gas with variable area flow meter (0-30 l/min)	044524000

For optional flashback arrestors and quick couplings see section 9-14

Series 603

603 - example

Outlet point for the supply of technical gases from a ring pipeline, to be mounted at the wall, modular and extendable

- extendable as required
- anti-swiveling fixed pressure regulator/flashback arrestors
- completely with welding and soldering nipples for pipe
- nickel-plated tube with nickel-plated wall screens

order no.

mounting plate (completely mounted and tested)

603-1 one gas	280-__
603-2 two gases	280-__
603-3 three gases	280-__
603-X extendable at will	on demand

ball valves

	male thread	
fuel gases max. 40 bar	G 3/8 RH - G 3/8 LH	198107082
acetylene max. 1.5 bar	G 3/8 RH - G 3/8 LH	198107082
oxygen max. 30 bar	G 3/8 RH	198207072
shielding gas max. 40 bar	G 3/8 RH	198307078

outlet points-pressure regulators

acetylene max. 1.5 bar	044112900
oxygen max. 10 bar	044226300
shielding gas with manometer (0-30 l/min)	044524100
shielding gas with variable area flow meter (0-30 l/min)	044524000

For optional flashback arrestors and quick couplings see section 9-14

21. OUTLET POINTS

Series 503

for cutting machines

503 - example

Outlet point with integrated gas filters for the supply of cutting machines, for fuel gas, heating- and cutting-oxygen

- nickel-plated tube with nickel-plated wall screens
- inlet with fittings and ball valves, incl. gas filter 622, flashback arrestor 85-10
- DIN EN ISO 5175 preventing counter flow and flashback
- completely mounted and tested
- compact design

order no.

outlet point 503 3-fold 280030091

1x acetylene, P inlet max. 1.5 bar, max 4.5 m³/h
(inlet welding nipple OD 21.3mm, ball valve DN 10,
gas filter 622, pressure regulator, flashback arrestor 85-10,
outlet G 3/4 LH male with cone)

1x oxygen for heating, P inlet max. 16 bar, max 45 m³/h
(inlet pipe coupler for pipe 15x1, ball valve DN 10,
gas filter 622, pressure regulator, flashback arrestor 85-10,
outlet G 3/4 RH male with cone)

1x oxygen for cutting, P inlet max. 16 bar, max 68 m³/h
(inlet pipe coupler for pipe 15x1, ball valve DN 10,
gas filter 622, pressure regulator, flashback arrestor 85-10,
outlet G 3/4 RH male with cone)

“Quality and safety for more than 75 years

Read on our website what WITT has achieved in 75 years of company history.

Find out about facts and figures, our quality standards, and marvel at our long history of innovation.

► www.wittgas.com

Series 722

test rig 722 + clamp 743

Test rig for the annual testing of flashback arrestors and non-return valves up to DN 50, testing:

- leak-tightness to atmosphere
- non-return valve against low and high back pressure
- operating pressure of pressure sensitive gas cut off valve
- measuring of flow capacities of flashback arrestors

order no.

test set (test rig 722 + clamp 743)	101000013
test rig 722	101000010
clamp 743	101000012

“WITT - for your safety and peace of mind.

Ever increasing legal requirements plus the moral and financial costs of accidents place an even higher onus on safety.

Therefore, each company dealing with technical gases is well advised to make a realistic risk assessment and be sure to be following best practices. Flashback arrestors and most other components of gas supply (acetylene, O₂, other fuel gases, inert gas) should be checked for safety at least annually.

WITT can support you: by providing advice and service as well as suitable test equipment - for your operating and legal certainty.

Talk to us: witt@wittgas.com or tel. 0049-(0)2302-89010

23. EQUIPMENT FOR OXYGEN LANCING

LK		lance holders		
	Lance holders for oxygen - for safe and comfortable holding of lance - for quick and safe changeover	model	inlet → outlet (Ø pipe in mm)	order no.
		LK-3	G 3/4 AGS → 1/8" (9.1 - 10.2)	040996500
		LK-4	G 3/4 AGS → 1/4" (12.0 - 13.7)	040996200
		LK-5	G 3/4 AGS → 3/8" (16.0 - 17.2)	040996100
		LK-6	G 3/4 AGS → 1/2" (20.0 - 21.5)	040996300
		LK-7	G 1 AGS → 3/4" (26.0 - 27.3)	040687000
		inlet reducer:		
		G3/8 AGS → G3/4 IG		802339600K
		G1/2 AGS → G3/4 IG		802339700K
		G3/4 AGS → G 1 IG		802418700K

SRV		backfire stop		
	Backfire stop with temperature controlled cut-off valve - protects against gas return and flashback - combinable with WITT oxygen lancing equipment - with copper sealing	model	inlet → outlet	order no.
		SRV-2.1	3/4" AGS → 3/4" IG (up to LK 4)	040996400
		SRV-2.2	3/4" AGS → 3/4" IG (from LK 5)	040686100
		SRV-3	1" AGS → 1" IG (from LK 7)	040686200
		inlet reducer:		
		G3/8 AGS → G3/4 IG		802339600K
		G1/2 AGS → G3/4 IG		802339700K
		G3/4 AGS → G 1 IG		802418700K

GHV		safety lancing valve		
	Safety lancing valve with lever operation - lever valve for an immediate interruption of gas supply when let go - combinable with WITT oxygen lancing equipment	model	inlet → outlet	order no.
		GHV	G 3/4 AGS → G 3/4 MG	040210200

KLK		lance holder compact		
	Compact lance holder, with integrated lever valve, non-return valve and temperature controlled cut-off valve - combination of several safety elements in one device - compact and ergonomic	model	inlet → outlet (Ø pipe in mm)	order no.
		KLK-4	G 3/4 AGS → 1/4" (12.0 - 13.7)	040210400
		KLK-5	G 3/4 AGS → 3/8" (16.0 - 17.2)	040210500
		KLK-6	G 3/4 AGS → 1/2" (20.0 - 21.5)	040210600

23. EQUIPMENT FOR OXYGEN LANCING

Shut-off valve

Shut-off valve for oxygen

- for the manual interruption of gas supply

model	connection	order no.
cut-off valve	G 3/4 IG	800721400
working-overpressure max. 25 bar		
adapter	G 3/4 AGS → G 3/4 AGS	952023700
adapter	G 3/4 AG → G 3/4 MG	100011116

04/01/2022

“From the outlet point to the lance...”

In this overview you will find the whole WITT portfolio of oxygen-lancing equipment, clearly laid out by module.

24. GAS FILTERS

6 2 2

Modell C

Modell D

Modell A

For reliable protection against contamination by ultrafine filtering of particulates (approx. 40 µm)

- broad range of uses
- change of filter possible while installed
- high flowrate
- easy mounting
- increases service life of downstream fittings and equipment

model	connections	order no.
622 A	G3/8 IG - G3/8 RH AGS	186-001
622 A	G3/8 IG - G3/8 LH AGS	186-003
622 C	G1/2 IG - G3/8 LH AGS	186-004
622 D	G1/2 IG - G3/8 LH AGS	186-005
replacement filter		955003000

7 7

For reliable protection against contamination by ultrafine filtering of particulates and moisture

- with condensate drain
- increases service life of downstream fittings and equipment
- change of filter possible while installed
- high flowrate

model	connections	order no.
77 (approx. 40 µm)	G 3/4 IG	077-001
replacement filter 3-part		FI-077
77 (approx. 10 µm)	G 3/4 IG	077-004
replacement filter 3-part		FI-078
77 (approx. 50 µm)	G 3/4 IG	077-010
BAM tested for oxygen, with bronze filter		
replacement filter bronze 3-part		FI-077B
77 (approx. 5 µm)	G 3/4 IG	077-012
BAM tested for oxygen, with bronze filter		
replacement filter bronze 3-part		FI-077B8
installation kit		966.0313
enabling active monitoring of filter contamination by means of differential pressure		

6 2 5

For reliable protection against contamination by ultrafine filtering of particulates and moisture (approx. 40 µm)

- with condensate drain
- increases service life of downstream fittings and equipment
- change of filter possible while installed
- high flowrate

model	connections	order no.
625	G 1.1/4 AG	042-001
625	flange DN 25	042-007
625	flange DN 32	042-006
625	flange DN 40	042-015
625	flange DN 50	042-016
625	flange DN 80	042-009
replacement filter 4-part		FI-625

5 7

For reliable protection against micro-contamination of gases, e.g. in laboratories or burner supplies in the glass industry (~3 µm)

- resistant to corrosion by stainless steel filter inserts
- high flowrate
- increases service life of downstream fittings

pure filter

model	connections	order no.
57	G 3/8 IG - G 3/8 AGS	184007070
replacement filter		FI-057

24. GAS FILTERS

807		pure filter		
	For reliable protection against micro-contamination of gases, e.g. in laboratories or burner supplies in the glass industry (approx. 5 µm) - resistant to corrosion by stainless steel filter inserts - high flowrate - increases service life of downstream fittings and equipment	model	connections	order no.
		807 (approx. 5 µm)	1/4" NPT IG	185-002
		replacement filter		956333400

HD		stainless steel filter		
	For reliable protection against micro-contamination of gases, for installation in gas pipelines - filter inserts in chromium-nickel-steel - high flowrate - increases service life of downstream fittings and equipment	model	connections	order no.
		HD (approx. 30 µm)	G 3/4 IG	187-005
		HD (approx. 80 µm)	G 3/4 IG	187-004
		replacement filter 30 µm		FI-187-30
		replacement filter 80 µm		FI-187

25. METERING VALVES

PMV		precision metering valve		
	For precise setting of gas volumes, e.g. in laboratory or for burner supply - for very small gas flow rates - resistant to dirt compared to needle valves - available with three different degrees of fineness - available as mounted block or just as valve cartridge	model		
		PMV with digital knob and locking ring		
		PMV with standard knob		
		metering valve cartridge		

“The best precision metering valve for very low flow rates

Available as single valve cartridge or in a block with different knobs:

- standard knob with 14 turn spindle
- digital knob with 1499 divisions and locking ring

26. BALL VALVES

Ball valves		for acetylene		
 example	PN25 up to max. 1.5 bar working pressure DIN ISO 228/1 - housing: steel - female connections	DN / connection	length	order no.
		6 / G 1/4	50 mm	198105050
		8 / G 3/8	55 mm	198107071
		12 / G 1/2	75 mm	198109091
		20 / G 3/4	80 mm	198111110
		25 / G 1	90 mm	198113130
		32 / G 1.1/4	110 mm	198115152
		40 / G 1.1/2	120 mm	198117172

Ball valves		for methane, LPG, shielding gas, air		
 example	PN25 up to max. 25 bar working pressure DIN ISO 228/1 - housing: steel - female connections	DN / connection	length	order no.
		6 / G 1/4	50 mm	198305050
		8 / G 3/8	55 mm	198307070
		12 / G 1/2	75 mm	198309090
		20 / G 3/4	80 mm	198311110
		25 / G 1	90 mm	198313130
		32 / G 1.1/4	110 mm	198315150
		40 / G 1.1/2	120 mm	198317170

Ball valves		for oxygen		
 example	PN10 up to max. 10 bar working pressure DIN ISO 228/1 - housing: steel - female connections	DN / connection	length	order no.
		6 / G 1/4	50 mm	198205050
		8 / G 3/8	55 mm	198207070
		12 / G 1/2	75 mm	198209090
		20 / G 3/4	80 mm	198211110
		25 / G 1	90 mm	198213130
		32 / G 1.1/4	110 mm	198215151
		40 / G 1.1/2	120 mm	198217170

Ball valves		for oxygen		
 example	PN40 burn out safe up to max. 40 bar working pressure DIN ISO 228/1 - housing: brass - female connections	DN / connection	length	order no.
		6 / G 1/4	50 mm	198205052
		8 / G 3/8	55 mm	198207075
		12 / G 1/2	75 mm	198209092
		20 / G 3/4	80 mm	198211112
		25 / G 1	90 mm	198213131
		32 / G 1.1/4	110 mm	198215150
		40 / G 1.1/2	120 mm	198217172

26. BALL VALVES

Ball valves

PN40

EN 560

- housing: nickel-plated brass
- male connections

DN / connection	length	order no.
for acetylene (max. 1.5 bar):		
10 / G 3/8 RH AGS - G 3/8 LH AGS	89 mm	198107082
for fuel gases (max. 40 bar):		
10 / G 3/8 RH AGS - G 3/8 LH AGS	89 mm	198107082
for oxygen (max. 30 bar):		
10 / G 3/8 RH AGS - two-sided	89 mm	198207072
for shielding gas (max. 40 bar):		
10 / G 3/8 RH AGS - two-sided	89 mm	198307078

Flange ball valve

example

PN25 / PN40

EN 558-1 (DIN 3202)

- housing: steel

DN	length	order no.
for acetylene (max. 1.5 bar):		
20	150 mm	198150500
25	160 mm	198147470
32	130 mm	198152521
40	140 mm	198153531
50	150 mm	198154542
65	170 mm	198155551
80	180 mm	198156560
100	190 mm	198157570
for air and shielding gas (max. 40 bar):		
20	150 mm	198350502
25	160 mm	198351515
32	130 mm	198252525
40	140 mm	198353533
50	150 mm	198354543
for air and shielding gas (max. 25 bar):		
65	170 mm	198355553
80	180 mm	198356561
100	190 mm	198357571
for oxygen (max. 10 bar):		
20	150 mm	198250500
25	160 mm	198247470
32	130 mm	198252521
40	140 mm	198253532
50	150 mm	198254540
65	170 mm	198255551
80	180 mm	198256561
100	190 mm	198257570

Flange ball valves

example

PN40

up to max. 40 bar working pressure

- housing: stainless steel
- burn-out safe

for oxygen

DN	length	order no.
20	150 mm	198250502
25	160 mm	198251510
32	130 mm	198252523
40	140 mm	198253534
50	150 mm	198254543
65	170 mm	198255552
80	180 mm	198256562
100	190 mm	198257571

26. BALL VALVES

High pressure ball valves

for acetylene

PN320

max. 25 bar

DIN ISO 228/1

- housing: steel
- female connections

DN / connection	length	order no.
6 / G 1/4	50 mm	198105055
6 / G 3/8	72 mm	198107077
10 / G 3/8	55 mm	198107078
10 / G 1/2	72 mm	198109099
10 / G 3/4 LH AG flat	82 mm	198112120
12 / G 1/2	75 mm	198909090
20 / G 3/4	80 mm	198111116

27. SAFETY HOSE REELS

DS Automatic

for fuel gases and oxygen

Safety hose reel with twin hoses DN 9/6,3

- drum breaking mechanism prevents strain on hose
- guide rails on both sides ensure neat and strain-free rolling
- various mounting options
- ball-bearing mounted drum

model	length of hose	order no.
DS-08	8 m	060120800
DS-10	10 m	060121000
DS-15	15 m	060121500
DS-20	20 m	060122000
DS-25	25 m	060122500
DS-30	30 m	060123000

“More than standard connections, pressures and performance.

When we say, "Please specify gas, pressures, temperatures, flows and connections at time of enquiry and order. For some gases, special seals may be required. Special designs, higher flow capacities or different pressures on demand" this is not just a standard text on our data sheets and catalogues, it's our daily work.

For most models we offer many more options than the standard versions.

For the integration of a safety device into copper or stainless steel pipelines

max. 25 bar working pressure

thread-connection: EN 560

- A=AGS
- B=MG

Types of threads:

IG -
simple
female thread

AG -
simple
male thread

MG -
female thread with ball head,
metallic self-sealing

AGS -
male thread with
counterbore

Turning of threads:

- RH** right-handed
- LH** left-handed

Training

Topics:

- Gas safety equipment
- Gas mixing systems
- Gas analysis systems
- Leak detection systems

The training will be tailored to the knowledge of the attendees, with theory and practical elements as required.
By request a test can be held at the end of the training.

Daily rate (per person): Including lunch, excluding hotel accommodation

Location: WITT headquarter in Witten

Minimum attendance: 4 persons

Maximum attendance: 8 persons

Documentation, Certification and Instruction manuals

	order no.

General Terms and Conditions

The entire text of our General Terms and Conditions may be downloaded at www.wittgas.com

Conversion of units of measurement:

Pressure all pressure specifications are in barg
10 bar = 145 psi

Flow 10 m³/h = 353 scfh

Temperature °C * 1.8 + 32 = °F

Volume 10 litres = 21 pints / 2.2 gallons

Length 10 mm = 0.3937 inches
1 m = 39.37 inches

Please note:

Most of our technical and marketing documents are available in multiple languages, please see www.wittgas.com.

iGases - Interactive lexicon for technical gases

Features:

- important physio-chemical characteristics (density, steam pressure, ignition range, thermal conductivity, safety information)
- unit converter for important values such as pressure, volume (flow), temperature, mass into international units
- direct access to the WITT data sheets
- dialogue tool, giving direct access to WITT specialists
- flow calculation
- gas advisor
- in four languages: English, Spanish, French, German

OUR PRODUCT RANGE

GAS CONTROL EQUIPMENT

Gas mixing systems
Gas metering systems
Gas analysers
Leak detection systems
Gas pressure vessels
Engineering of customised systems

GAS SAFETY EQUIPMENT

Flashback arrestors
Non-return valves
Quick couplings
Safety valves
Stainless steel devices
Gas filters
Pressure regulators
Lance holders
Ball valves
Automatic hose reels
Test equipment
Accessories
Customised safety devices

WITT-Gasetechnik GmbH & Co. KG
